

Table 1: Individual interview participants—tūroro.

Participant	Gender	Residence	North vs South Island	Time since event
A	Female	Rural R2	North	2 years
B	Female	Urban U1	South	3 years
C	Male	Rural R1	North	1 year
D	Female	Urban U2	North	1 year
E	Female	Urban U2	North	1 year

Rural/urban classification is defined using the Geographic Classification for Health.³

Table 2: Focus group one participants.

Participant	Gender	Connection to the tūroro
1	Male	Tūroro
2	Female	Whānau member (witnessed the event)
3	Female	Whānau member
4	Female	Whānau member
5	Female	Whānau member
6	Male	Different whānau

The experiences of the focus group one whānau took place in a rural (R2) area³ in the North Island, approximately 30 years ago.

Table 3: Focus group two participants.

Participant	Gender	Connection to the tūroro
1	Male	Tūroro
2	Female	Whānau member (witnessed the event)
3	Male	Whānau member (witnessed the event)
4	Male	Whānau member
5	Female	Whānau member
6	Male	Whānau member

The experiences of the focus group two whānau took place in an urban (U2) area³ in the South Island, 6 years ago.
